

Urban Operations in the Year 2020

Study Report

Study Director

Colonel Philip Baxter, UK Army

Directorate of Land Warfare, UK MOD

Participating Nations

CA, FR, GE, IT, NL, UK, US

Reasons for the Study

- NATO equipment and structures optimised for conventional warfighting within Alliance boundaries
- Military concepts and doctrine do not adequately address urban issues
- Asymmetric threat, emerging key technologies and urban operations are major drivers and challenges for future Alliance operations

Study Aim

To develop a conceptual framework that will support missions in urban terrain at the operational level of command in the year 2020

Study Deliverables

- Study Report
- Briefing to SAS Panel, CNAD and MC

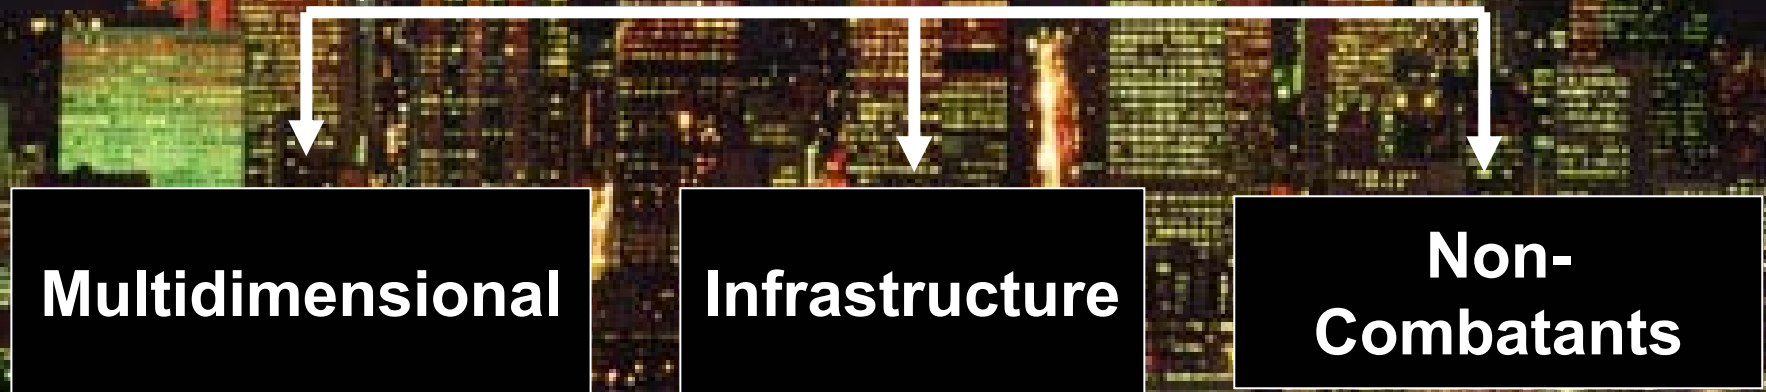

Study Duration - Jun 00 to Jun 02

- Examined the Future Operating Environment
- Established an operational approach
- Identified likely missions and operational concepts
- Completed a capability survey
- Conducted a Capability Assessment (CAPS)
- Conducted an Urban Seminar Wargame (USW)
- Refined conclusions and recommendations
- Completed Report

WHY OPERATE IN URBAN AREAS?

NATURE OF URBAN AREAS

Inter-relationship of the three elements

■ Attrition

- High casualties
- Significant damage
- Destruction of infrastructure

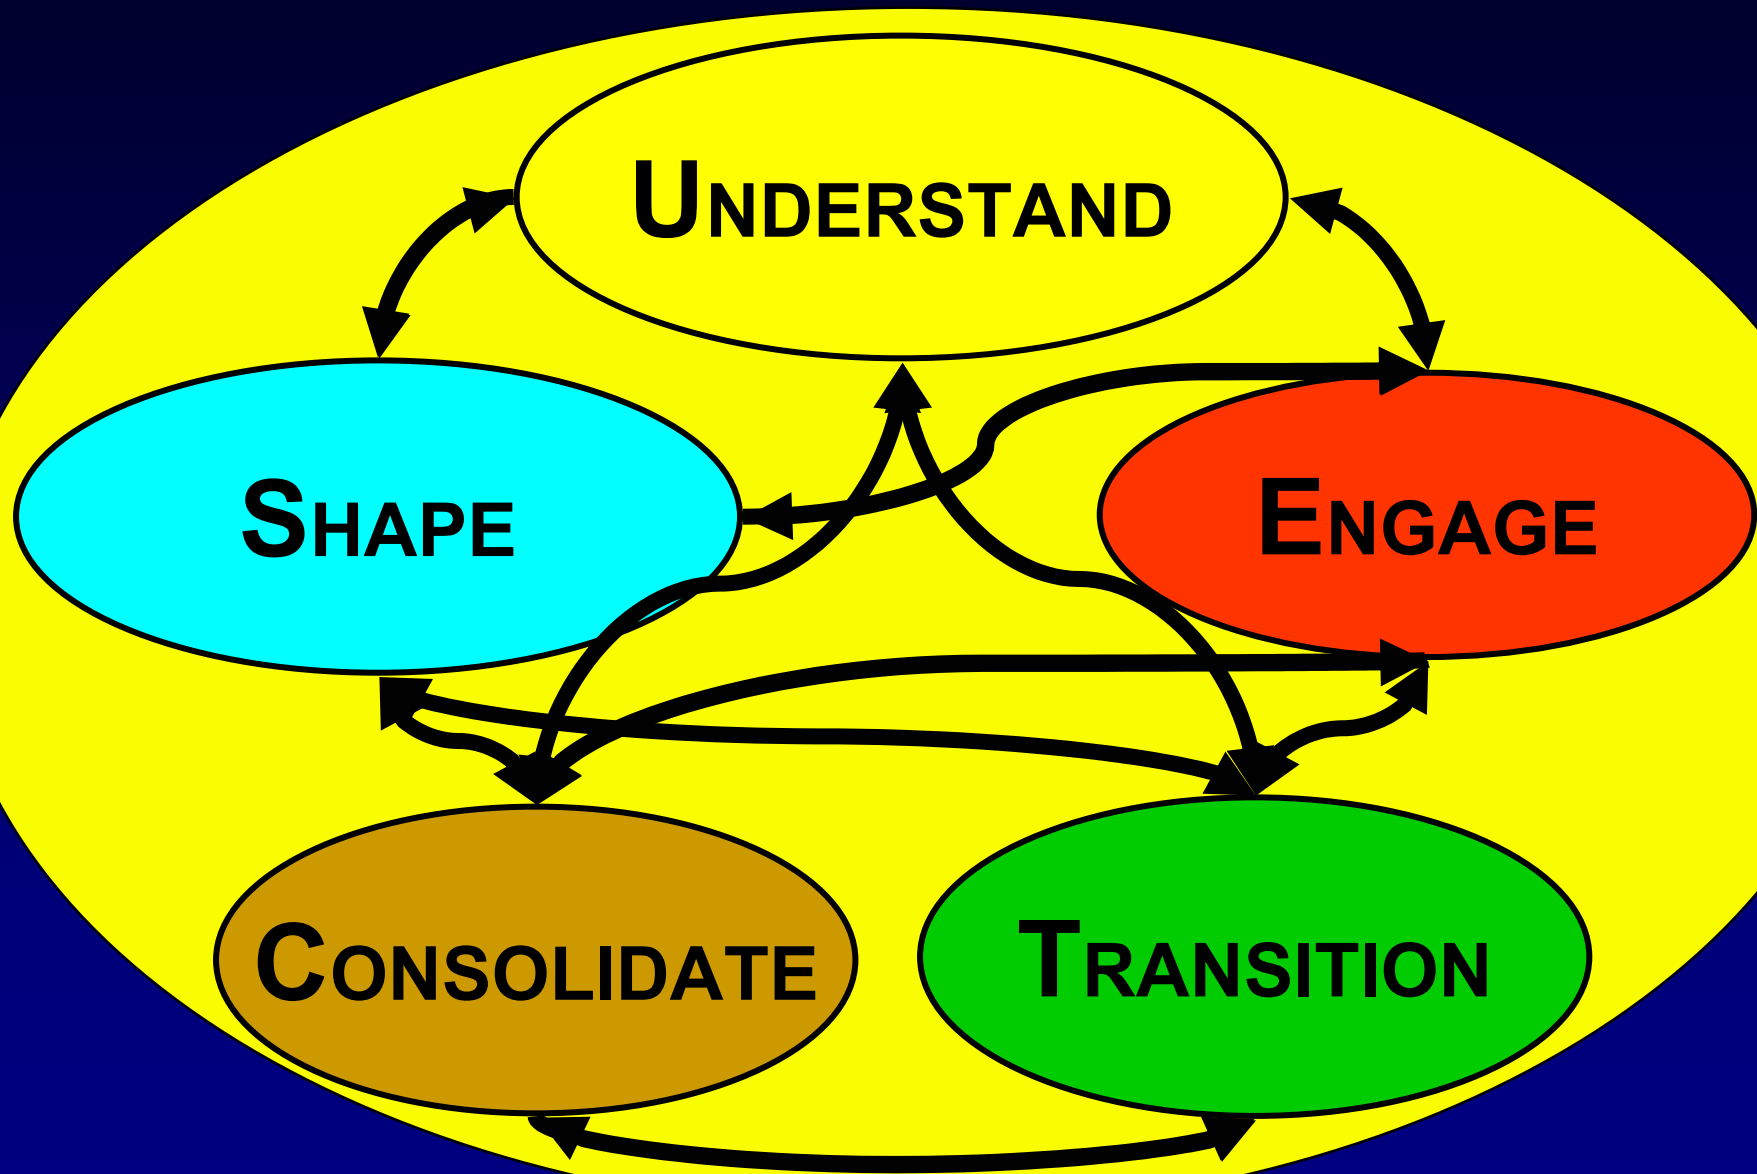

■ Manoeuvrist

- Effects based
- Reduced casualties (own, non-combatant, enemy)
- Reduced collateral damage

**A “Groznyesque” solution
is no longer acceptable!**

A “NEW” approach is required

Results from Capability Assessment

- Merged the original 53 capabilities to 42
- Identified 15 Capabilities as key
- Materiel:
 - Mapped 79 system concepts against 42 capabilities
 - Merged 79 system concepts into 36 and ranked them
 - Selected 12 candidates for USW
- Non-Materiel:
 - Identified potential solutions for 42 capabilities

Examples of Capability Requirements

- U** Have an overall understanding of the global and local situation
- S** Deny enemy having effective C4ISTAR
- E** Destroy or neutralize fixed and mobile targets

Examples of DOT solutions

- D** • 3D-battlespace co-ordination doctrine for urban operations
- D** • CSS Doctrine for Urban Operations
- O** • HUMINT units
- O** • Armoured, readily available and air-transportable supply services
- T** • Train with a focus on the region of operation, i.e. political, ethnic, religious, cultural, social aspects, history and national language
- T** • Joint training for urban operations

Key 15

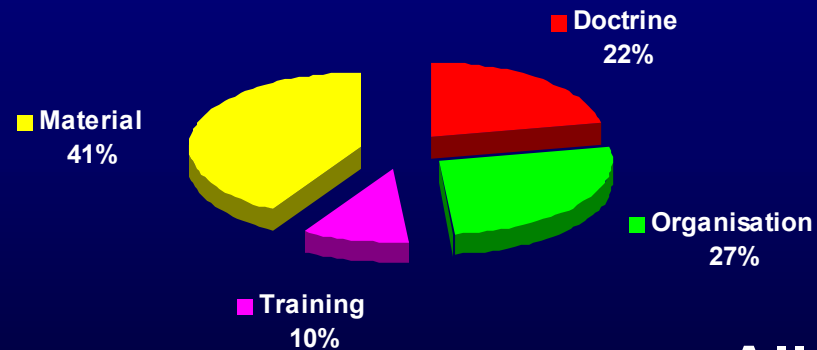

Doctrine

Organisation

Training

Materiel

**Investment across DOTM
is the solution**

All 42

- **Urban Operations will be a major component of future operations**
- **The influence of non-combatants on operations across the spectrum will remain a major feature**
- **The individual soldier will remain an essential element of urban operations.**
- **There are no easy solutions**

- **USECT provides an effective framework**
- **UNDERSTAND is the critical component**
- **Doctrine and Training solutions provide the greatest opportunity for short term improvements**
- **Materiel solutions will be realised from new technologies, most significantly in the mid to long term**

- 1** The operational concepts, capability requirements and potential solutions from this study should be expanded and further investigated, using the USECT framework; this should include urban concept development and experimentation
- 2** The findings of this study should be reflected in the NATO Defence Planning Process as Long Term Requirements
- 3** NATO should establish a Branch level lead within SHAPE to provide oversight as the focal point for future urban activities, and assign suitable POCs within NATO staffs for coordination, planning and operations

4 NATO should establish an Urban Operation Working Group to work to the nominated Branch to:

- Serve as the focal point for coordination of all urban capability development activities, including further studies
- Build a detailed plan for future activities utilising directions in UO 2020 study to:
 - Build upon national efforts to identify gaps and leverage opportunities
 - Provide initial focus on urban specific joint concept development & experimentation in urban C4ISTAR

5 RTB should endorse the study and recommendations, and forward them to the MC, CNAD and the Strategic Commands

Detailed plan

Directions for future activities

Across DOTMLPF:

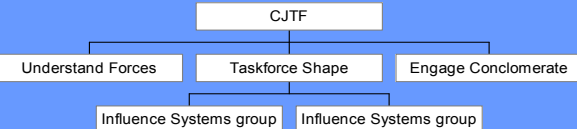

- **Concept Development & Experimentation (C4ISTAR focus)**
- **Modelling & Simulation**
- **Policy**
- **Interoperability**
